STEP 0 · REPO SCAN

What Curi is today

From the curio repo: React 19, Vite 8, Tailwind 4, Framer Motion, Supabase, vite-plugin-pwa. The live site would not load from my sandbox, so everything here is read from source.

Screens and routes

Landing, Sign up, Log in, Check email, Install nudge, Notification permission, Home, My Collection, Dictionary, Settings, Admin.

Modals: Milestone, Streak lost, Shield explainer, Shield saved notice, Share card, Dictionary result, Quiz answer feedback, Install and notification re-enable banners.

The core loop

Home shows Today's Word and Today's Fact side by side, plus an "Old but gold" word and fact resurfaced from 2+ days ago (least shown first).

The Daily Quiz mixes questions on today's word, today's fact and an older item. Finishing the quiz is what counts the day. A perfect quiz earns a gold star on the calendar.

Streak rules

A missed day resets the streak to 0 on next open, and the old number is kept so it can be restored. One shield earned every 7 days, max 2 held. Restoring costs 1 shield per missed day.

Streaks under 3 reset quietly with no loss screen. Milestones at 7, 30, 60 and 100.

Data model (Supabase)

users current_streak, longest_streak, last_active_date, shield_count, lost_streak, last_milestone_shown, shield_used_at, notifications_enabled, notification_token[], installed

facts image_url, hook_line, context_line, bullet_1 to bullet_4, category, publish_date (one per day)

user_fact_progress same pattern for facts

words word, definition, example_sentence, pronunciation_audio_url, category, publish_date (one per day)

user_word_progress first_seen_at, times_shown, last_resurfaced_at, saved, marked_known

user_activity_log activity_date, quiz_perfect · **feedback**

Behind the scenes

Edge functions for daily word and fact push, re-engagement push and email, setup reminders, welcome email, account deletion. Share cards via html2canvas. PostHog, Sentry, custom service worker.

Visual system today

paper #F6F4EF
ink #1C2B3A
ember #D8492F
moss #3E6259
gold #C7962E
faded #7C8A93

Fraunces display, Sora UI, IBM Plex Mono for utility labels. Dark mode exists (night #12191F). The only mascot is an abstract round face in the quiz with three moods.

Keep exactly as it works

The word, fact, quiz order. Quiz completion as the thing that counts the day. Shield earning and restore rules. "Old but gold" resurfacing. Share cards, the push pipeline, Supabase auth with email and Google.

These stay as the logic layer. The redesign changes the surfaces on top and adds new tables beside them.

What the redesign has to fix

01 Contrast

Faded ink on paper is 3.2:1 and white on ember #E8472A is 3.9:1. Both fail AA for body and button text. New tokens fix this.

02 Content is global

One word and one fact per publish_date for everyone. 3 or 5 words, levels and topics need content tagged by style, level and topic, and a per-user daily pick.

03 No plan, no onboarding

Sign-up goes straight to install and notification nudges. Nothing asks what the person wants to learn.

04 No progression

05 Home has no finish line

06 Thin settings, mixed mascot

VISUAL DIRECTION · FOR APPROVAL

Field Journal

A curious person's notebook. Warm paper, confident ink, one ember accent at a time, and small rewards you collect like pebbles. Calm by default, celebratory only when it's earned.

Paper, not plastic
Flat warm surfaces, hairline borders, soft two-layer shadows. No gradients or glows.

One ember per screen
Ember marks the next thing to do. Gold means reward, moss means correct. Everything else is ink.

The word is the hero
Fraunces carries words, facts and big numbers. Sora handles everything you tap or scan.

Tactile, not loud
Buttons have a pressable base edge. Rewards are small objects you keep, not confetti storms.

Colour

Contrast measured against paper #F6F4EF unless noted

Aa 5.1:1

ember-500
#E8472A · brand mark, flame, art. Not for small text.

MASCOT · FOR APPROVAL

Curi the otter

Curious, warm, slightly witty. A companion who learns alongside you, never a teacher who grades you. Otters keep a favourite stone, so Curi carries a slate pebble with a gold fleck. Today's word is its treasure, and every finished day drops a pebble in your pouch.

Idle

HOME HEADER, NAV

"Morning. I found something shiny for you."

Curious tilt

ONBOARDING, DICTIONARY

"Ooh. What are we looking up?"

Cheering

DAY COMPLETE, PERFECT QUIZ

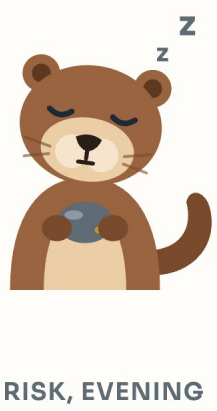

"All three done. That's a full pouch."

Proud

MILESTONES, LEVEL UP

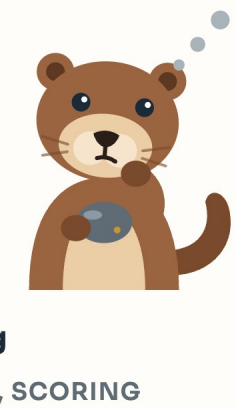

"30 days. I'm telling the other otters."

Sleepy

STREAK AT RISK, EVENING

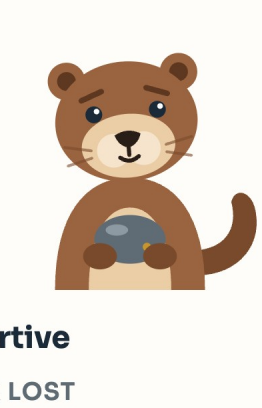

"Still time today. Two minutes, then we nap."

Thinking

LOADING, SCORING

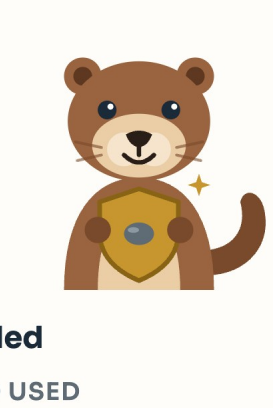

"Turning the pebble over..."

Supportive

STREAK LOST

"Streaks pause. What you learned stays. Want your 12 back?"

Shielded

SHIELD USED

"I held the shield for you yesterday. Your 12 is safe."

How Curi talks

First person, one short line, under 60 characters where it can be. Warm first, witty second. Talks about the two of you ("we", "our pouch"), uses the person's first name at most once a day.

Never: "You failed", "Don't lose your streak!", countdown pressure, stacked exclamation marks, emoji, or comparing someone to other learners. A lost streak is framed as a pause, and what was learned is always said to be kept.

Rules for drawing

Flat fills from five fur and cream tones, no outlines, no gradients. Always holds the pebble unless the moment needs its paws (cheering, thinking, shield). Shown at 32, 48, 96, 150 or 220px. Below 32px use the pebble alone.

Built as one SVG component with a mood prop, so React gets <Otter mood="sleepy" /> and Framer Motion can animate head, paws and pebble separately.

Where Curi shows up

Onboarding
Curious on every step, cheering on the plan summary. "Let's set up your daily pouch."

Empty states
Idle with an empty paw. "Nothing saved yet. Tap Save on a word worth keeping."

Loading
Thinking, dots pulse. Only after 400ms, so fast loads show skeletons instead.

Quiz results
Cheering for 3/3, proud for 2/3, supportive for less. "One slipped. It'll come back around."

Streak moments
Sleepy for at risk, shielded for a save, supportive for a loss, proud for milestones.

Notifications
Otter avatar as icon. "Today's word is a strange one. Come see." / "Still time for today."

Share cards
Small, in a corner, holding the pebble. Never covers the word or the score.

Error and 404
Curious tilt. "This page swam off. Let's head home." / "Something got tangled. Try again?"

Good morning,
Promise

1 · Today's fact, front

Today's fact · Space
Step 2 of 3

A day on Venus is longer than its whole year.

It spins so slowly that it orbits the Sun before finishing one turn.

Flip for the details

Got it · on to the quiz

2 · Fact, flipped

Today's fact · Space
Step 2 of 3

KEY POINTS

Why Venus runs on its own clock

1. One spin takes about 243 Earth days.
2. One trip around the Sun takes about 225.
3. It also spins backwards compared with most planets.
4. So on Venus, the Sun rises in the west.

Flip back

Card flips on Y axis, 420ms spring-soft. Reduced motion: crossfade.

Got it · on to the quiz

3 · Quiz, right answer

Curi · 8:00 PM
Still time for today. Two minutes, then we nap.

Push preview, sent once at the chosen nudge time

Good evening, Promise 12

Your 12 days are waiting

Today's plan is open until midnight. About 4 minutes.

Start today's plan

You have 2 shields if tonight gets busy

3 · Shield used, streak saved

SHIELD USED

Your 12 is safe.

You missed yesterday, so I held a shield up for you. Your streak carries on today.

Used · 1 left

Every 7 days in a row earns a new shield. You can hold 2.

Start today

4 · Streak paused, restore

Your 12-day streak paused

You missed 2 days. Everything you learned stays in your pouch. Want your 12 back?

You have 2 shields **Costs 2**

Restore with 2 shields

Start fresh

No shields? Only "Start fresh" shows, with "your next shield arrives after 7 days".

5 · Milestone, 30 days

MILESTONE

30

30 days in a row.

I'm telling the other otters. That's 90 words and 30 facts you didn't know a month ago.

Something got tangled

I couldn't load today's word. Your streak is safe while I try again.

Try again

5 · 404

404

This page swam off

Let's head back to today.

Go home

6 · Nothing to review

All caught up

Nothing is due today. Next review: 4 words on Thursday.

Play a Word Duel instead

STEP 5 · RULES

Gamification rules and motion

Learning earns the most. Games and social add a little on top, capped, so the daily word, fact and quiz always stay the main way to grow.

XP

Got it on a word	**+10 each**
Read the fact	**+10**
Finish the quiz	**+20**
Each correct answer	**+5**
Perfect quiz bonus	**+15**
Day complete bonus	**+10**
Review card	**+2 (max 30 a day)**
Daily quest	**+15 to +30**
All 3 quests	**+20**
Duel win / played	**+40 / +15**
Game XP cap	**100 a day**

A typical 3-word day earns 90 to 130 XP.

Levels and titles

XP needed from level n to n+1 = 100 + 100n. So 200 to reach level 2, 500 to go from 4 to 5. About one level a week early on, slowing later.

1 to 2	**Curious Pup**
3 to 4	**Word Scout**
5 to 6	**Lexicon Explorer**
7 to 9	**Fact Finder**
10 to 14	**Wordsmith**
15 to 19	**Sage of the Shore**
20+	**River Scholar**

Daily quests

Three a day, one from each pool, picked at the start of the user's day.

Core (+20): learn today's words, read the fact.

Skill (+30): 4 of 5 on the quiz, a perfect quiz, review 3 saved words.

Explore (+15): look up a word, save a word, play a duel, share a card.

Quests never require social features for someone with no friends added.

Streaks and shields

A day counts when the quiz is finished, as today. A shield is earned every 7 days in a row, max 2 held. An invite that signs up gives both people a shield, still max 2.

1 missed day, shield held: used automatically on next open, then the "Your 12 is safe" screen. **2+ missed, enough shields:** the restore sheet asks. **Not enough:** streak paused, start fresh. Streaks under 3 still reset quietly.

Only logic change: auto-use for a single missed day. Today the person always has to tap Restore.

Mastery and review

Interval ladder: 1, 3, 8, 21, 45, 90 days. "Knew it" climbs one step, "Sort of" stays, "Not yet" drops to 1 day.

New until first review. **Learning** while the interval is under 21 days. **Mastered** at 21+. Mastered words still come back at 45 and 90.

Saved words and any word missed in the quiz join the queue. "Old but gold" becomes the review question in the daily quiz. Max 20 reviews a day.

Quiz, goals, pebbles

Quiz: one question per word (3 at most, picked at random from 5), 1 on the fact, 1 review. 3 to 5 questions.

Weekly ring: fills by finished days Monday to Sunday against the chosen goal. Hitting it gives +50 XP.

Pebbles: streak 7, 30, 60, 100, 365 · 10 facts in a topic · 10, 50, 100 mastered · perfect week · first duel · first invite. Milestones also give +50, +100, +150, +250 XP.

Friends board: weekly XP, friends only, resets Monday 00:00 local, opt out any time.

Motion spec

Framer Motion · tokens from the design system

Moment	Trigger	What moves	Timing	Reduced motion
Got it	Tap primary on word	Button presses to 0.96. Card exits left 40px with fade, next card enters from right. +10 XP chip floats up 24px and fades.	spring-snappy, about 280ms	Crossfade 120ms
Save	Tap bookmark	Icon fills, scales 1 to 1.2 to 1. Toast slides up 16px with Undo.	spring-bouncy, 320ms	Fill only, no scale
Fact flip	Tap Flip	rotateY 0 to 180 with perspective 1000px. Back face swaps at 90deg.	spring-soft, about 420ms	Crossfade 160ms
Quiz right	Correct option chosen	Option border to moss, tick scales in from 0.6. Feedback bar slides up. Otter does one cheer hop. Light haptic.	200ms bar, spring-bouncy tick	Colour and icon only
Quiz wrong	Wrong option chosen	Option nudges x 0, -6, 6, -4, 0. Correct option then outlines in moss so the answer is learned.	320ms ease-out	No shake
Streak tick	Quiz finished	Old number rolls up out, new one rolls in. Flame scales 1 to 1.15 to 1. Today's pebble drops into the week row.	900ms sequence, stagger 120ms	Number swaps, pebble fades in
Shield used	App open after a miss	Shield rises from below and settles in front of the flame. Shield count ticks down.	spring-soft, 500ms	Fade in
Level up	XP crosses threshold	Bar fills to the end, level number flips to the next, sheet rises with the proud otter and new title.	600ms fill, spring-soft sheet	Sheet fades in
Page and otter	Route change, idle	Pages fade with 8px rise. Idle otter breathes at scale 1.015 on a 4s loop and pauses off screen.	240ms ease-out	Instant pages, still otter

Only one celebration plays at a time, in this order: shield, streak, milestone, level up. Read reduced motion with useReducedMotion() and also offer it in Settings. Sounds are off by default for anyone using reduced motion.

STEP 6 · HANDOFF

Build it with Claude Code

Drop-in tokens for src/index.css, the component list, the Supabase additions and the order to build in. Existing tables and streakLogic.ts stay; everything here sits beside them.

src/index.css · Tailwind v4 tokens

Live play over Supabase Realtime channels, one per room. RLS on every table.

A new edge function, build-daily-plan, runs on first open of the user's day (their timezone). It picks words by style and level, the fact by topic rotation, and freezes the quiz. The existing push functions read reminder_time from user_preferences instead of a fixed hour.

Build order

1 · Foundations
Tokens, fonts, Otter, base components, bottom nav and rail. Restyle Home, Word, Fact, Quiz, Settings on the current logic. Contrast fixed everywhere.

2 · Personalization
Content tagging, user_preferences, onboarding, build-daily-plan, multi-word flow, Home daily plan, My learning plan with Tomorrow or Right now.

3 · Rewards
XP events, levels, quests, Day complete, weekly ring, shield auto-use, new milestone and loss screens, Progress screen, celebration queue.

4 · Review
Mastery fields, interval ladder, Review mode, Collection redesign, Old but gold moved into the quiz as the review question.

5 · Sharing and offline
New share cards, Daily challenge result with copy-as-text, offline cache of today's plan, install and notification prompts.

6 · Friends
Invites with shield reward, friends list, weekly board, streak buddies.

7 · Games
Rooms and codes, Word Duel first. Fact or Fiction next, Bluff the Definition last since it needs typed answers and moderation.

8 · Polish
Weekly recap email and push, sounds and haptics, desktop layouts at 1024+, analytics events in PostHog for each loop step.

Your brainstorm list, prioritised

Now, inside phases 1 to 5
Dark mode, Daily challenge share card, offline daily content, word and fact archive (the Collection), "Surprise me" for an extra fact, weekly recap push and email.

Next
"Use it in a sentence" with AI feedback (the strongest for retention), personal word lists, bookmarks with notes, listen-and-repeat pronunciation.

Later
Themed word packs (needs a content pipeline first). Home-screen widget, since a PWA can't ship a native widget without a wrapper app.
